Help db ntf: 20150827150000 / Content: 20150827150000
Windows Version: 4.5.17 :: MAC OS X Version: 2.0.49 :: Linux Version: 2.0.49
Eclipse Plugin: 2.5.2

Major Improvements: Fixes for Desktop Icon, Find Plugin, Set Startup Tabs, and Set Eclipse Preferences actions, RegEx escape improvements for references, Smart File Download actions now also work in background

Configuration Database  Fixed a bug in the Set Eclipse Preferences action, where the "When?" setting for widget categories did not work. It would always behave as if "Always" was selected. It now works as it should.  Fix / CHANGE  Changed the behavior of the Desktop Icon action when selecting the option to remove all links for users who don't see the action.  In the past, MarvelClient would continue to remove all links even after the icon action was deleted or disabled, meaning anything related to the replica ID of the application would keep disappearing on every client start.  From now on MarvelClient will stop removing links when you delete or disable the icon action, but will still remove them when a user cannot see an existing and enabled icon action due to settings on the When-lab.  Added a warning message to fields that are used to select a location; it will inform about the required DLL version for regex-escape syntax in references.  SINHANCEMENT  Smart File Downloader actions now are set to run in background as well, and will only run "once from start to end" by default. This	General Notes		
Citrix, Linux & Mac OS X: the MarvelClient Upgrade module is only available on Windows (=not on Citrix, Linux or Mac OS X) MarvelClient on Mac OS X and Linux does not support the runtypes "Before Login - Initi", "After Login - After Write", "On first server access", "Background - Init" and "Background" any such actions must be set to run at a different supported runtype, e.g., "After Login"  This release contains select important updates highlighted in red  Configuration Database  Configuration Database  TX  Fixed a bug in the Set Eclipse Preferences action, where the "When?" setting for widget categories did not work. It would always behave as if "Always" was selected. It now works as it should.  Tix / CHANGE  Changed the behavior of the Desktop Icon action when selecting the option to remove all links for users who don't see the action.  In the past, MarvelClient would continue to remove all links even after the icon action was deleted or disabled, meaning anything related to the replica ID of the application would keep disappearing on every client start.  From now on MarvelClient will stop removing links when you delete or disable the icon action, but will still remove them when a user cannot see an existing and enabled icon action due to settings on the When-tab.  CHANGE  Added a warning message to fields that are used to select a location; it will inform about the required DLL version for regex-escape syntax in references.  Smart File Downloader actions now are set to run in background as well, and will only run "once from start to end" by default. This means that a download can also be started while the client is running.  Existing actions will still only run in After Login (but can be changed to run in other run sections manually).		(Administrators need at least IBM Lotus Notes 8.x, selected administrative tasks, such as Online Update, also require Microsoft Windows)  Supported client-side operating systems: Microsoft Windows XP, 2003, 2008, Vista, 7, 8, and Citrix/WTS, Apple Intel Mac OS X 10.5-10.10 (Leopard, Snow Leopard, Lion, Mountain Lion, Mavericks, Yosemite), Linux  Supported server-side operating systems: any supported by IBM (operating system independent)	
Configuration Database  EXX Fixed a bug in the Set Eclipse Preferences action, where the "When?" setting for widget categories did not work. It would always behave as if "Always" was selected. It now works as it should.  EXX/CHANGE  Changed the behavior of the Desktop Icon action when selecting the option to remove all links for users who don't see the action.  In the past, MarvelClient would continue to remove all links even after the icon action was deleted or disabled, meaning anything related to the replica ID of the application would keep disappearing on every client start.  From now on MarvelClient will stop removing links when you delete or disable the icon action, but will still remove them when a user cannot see an existing and enabled icon action due to settings on the When-tab.  CHANGE  Added a warning message to fields that are used to select a location; it will inform about the required DLL version for regex-escape syntax in references.  ENHANCEMENT  NEW  Smart File Downloader actions now are set to run in background as well, and will only run "once from start to end" by default. This means that a download can also be started while the client is running.  Existing actions will still only run in After Login (but can be changed to run in other run sections manually). NEW means that a download can also be started while the client is running.  Existing actions will still only run in After Login (but can be changed to run in other run sections manually).	CHANGE		
Analyze Database	ENHANCEMENT / NEW	means that a download can also be started while the client is running.	
		Analyze Database	

Analyze Database	- No Changes -	
MarvelClient Help		
CHANGE	The Install Wizard will now set better titles for newly created MarvelClient databases.	
UPDATE	Updated release notes	
MarvelClient Upgrade		
MCUpgrade.exe (4.0.6.0)	- No Changes -	
Eclipse Plugin		
FIX (2.5.2)	Fixed a bug where under some circumstances Eclipse actions that are set to run when the Workspace is ready would run too early. The "WorkspaceReady" event now occurs slightly later and should now work in all cases.	
FIX (2.5.2)	Fixed a bug in the Startup Tabs action. In some cases the action would fail unless the checkbox "Discover" was set, which was not intended.	
FIX / CHANGE (2.5.1)	The Find Plugin action will no longer fail if no matching plugin is found, and instead properly set its return values to indicate that 0 plugins have been found.	
.DLL Updates (Windows)		
FIX (4.5.17)	Fixed a bug Zip/Unzip for Drag & Drop would still happen even if Zip/Unzip was disabled. This occurred because enabling attachment blocking also activated Zip/Unzip by accident.	
CHANGE (4.5.17)	Smart File Downloader actions now will restart in background if the file checksum changes (for example, if the source file in the action is changed)	
.dylib Updates (Mac OS X)		
CHANGE / ENHANCEMENT (2.0.49)	The syntax used to escape the result of a reference for regular expressions is now also supported on Mac.	
.so Updates (Linux)		
CHANGE / ENHANCEMENT (2.0.49)	The syntax used to escape the result of a reference for regular expressions is now also supported on Linux.
