MC Config - 20181106132700

ⓘ This component release is part of MarvelClient 10.0

FIX	Fixed an issue in Actions of type "Files\JFD. File Deployment", where the Download Option Dropdown did not always properly display Always|Newer Only|Missing Only for zip files, respectively Always|Missing Only for non-zip files
FIX	Added the new Notes 10 MailAddressing sub option "Type ahead shows server contacts before local" to Actions of type "Objects\A7.1. Location"
CHANGE	The default repeat setting (on the when tab) of Actions of type "Objects\A5. *.ini & variables" has been changed to persistent
CHANGE	The German text for "Keep local exec. info" on the When tab has been changed to "Ausführung merken". Note: the field provides context sensitive help when focussing it and pressing F1
CHANGE	The default target for Actions of type "Files\JFD. File Deployment" is now always <notes:data_directory>\subdir You are adivsed to change "subdir" (without quotes) as needed and can naturally use whatever target directory your end users have write permissions for
ENHANCEMENT	Added a Warning message to run program action, for which "Wait for program to finish" is selected in combination with Timeout=0 / infinite
