MC Config - 20190702093100

ⓘ This component release is part of MarvelClient 10.1

NEW	In the backup action, you can now select the desired ODS version for creation of limited replicas (this option requires an MC dll of >= 10.0.17)
FIX	Fixed an issue where OnlineUpdate would have an empty language selection if the Config database was newly created.
FIX	Fixed an issue in Automate sync where a SI database with no "Exception" databases would lead to errors.
FIX	Fixed an issue in Automate sync where the option "Including Subdirs" did not work for database paths set to "Other than".
FIX	Fixed a display issue where Indexed Installers would show "unknown action" as title.
CHANGE / ENHANCEMENT	Some additional information is now being displayed for Indexed Installers, such as package info and hash)
