

MC dll/dylib - 10.0.17

 This component release is part of [MarvelClient 10.0](#)

FIX	<p>Fixed an issue with the roaming action where in some cases it would perform a license check before login, and fail with the error "type 'roamingrollback' not licensed", even if roaming is licensed.</p> <p>The cause is that licenses cannot be checked before login in some situations (user name not yet known on first start, missing license because there is no actions.xml yet).</p> <p>This was introduced with MC dll/dylib - 10.0.0.</p>
FIX	Fixed an issue with limited replica roaming where the journal sometimes wasn't roamed properly on new machines due to a missing path for the journal in the config.
ENHANCEMENT	When creating limited replicas, you now can select the desired ODS version (UI available from template MC Config - 20190702093100).
