MC 12.0 - Eclipse Plugin Release Notes

These are the detailed release notes for the MarvelClient Eclipse Plugin, which is needed to manage the Eclipse part of Notes.

ⓘ   For a high-level overview of all changes, please take a look the main document for this release: **MarvelClient 12.0**

Releases in reverse chronological order:

Release 2023-06-15 - 12.0.3

FIX	Fix for a problem resulting in the error message "Error adding job listeners" in the Eclipse workspace logs on the Notes 14 beta client. This could also cause the restart prompt to be displayed unexpectedly on the Notes 14 client after a plugin was installed or removed using a MarvelClient action.

Release 2022-10-28 - 12.0.2

FIX	Fix for a problem where the plugin randomly would not start on the Windows 64-bit beta client.

Release 2021-07-16 - 12.0.1

CHANGE	Small internal modification to the startup sequence, with better logging if the Notes authentication service is unavailable.

Release 2021-05-04 - 12.0.0

ENHANCEMENT	New Sametime Auto-Status setting for "Meetings scheduled in my calendar".
CHANGE	Eclipse Analyze preferences file no longer contains /bundle_defaults entries (these were unreliable and made the file much larger than needed).
FIX	The Shortcut Buttons action now works properly in Notes 12.
FIX	The Eclipse Sidebar action now works properly in Notes 12.
