

MC 14.0 - Binary Release Notes

These are the detailed release notes for the MarvelClient binary files (dll and dylib) for Windows, Mac, and Nomad.

For a high-level overview of all changes, please take a look the main document for this release: [MarvelClient 14.0](#)

Releases in reverse chronological order:

- [Release 2024-04-18 - 14.0.6](#)
- [Release 2023-12-07 - 14.0.4](#)
- [Release 2023-09-08 - 14.0.1](#)

Release 2024-04-18 - 14.0.6

FIX	Fixed a problem where ECL actions that modify JavaScript and Applet entries might not run properly if other ECL actions also run but don't require modifications
FIX	Fixed a problem where the mc_temp.tmp file might not get deleted from the data directory when using a DLL update action to upgrade from Essentials to Full

Release 2023-12-07 - 14.0.4

ENHANCEMENT	Added detection for MacOS 14 Sonoma
CHANGE / FIX	Experimental support for new option to delay template updates when MarvelClient roaming is used, and a user is roamed to a Notes client with a new major version; this could cause an unwanted prompt for an ID file in certain circumstances (please talk to panagenda Consulting for details on enabling this option)
FIX	Fixed a problem where the roaming cleanup process might not remove all the old files in the roaming folder

Release 2023-09-08 - 14.0.1

CHANGE	Mac clients using Essentials no longer log to the console.log by default
FIX	Notes 14 clients can now be detected properly at initial start
FIX	Better detection of certificates when using the Write XML action to export keyfile information, eliminating the error "Certificate: unsupported size"
FIX	MarvelClient now properly detects that Notes 14 is using Eclipse 4.22.0 with the rich clients
